

Thank you for purchasing *The Best Boring Book Ever™ of Tableau for Healthcare!* Here is a quick description of the files that accompany this book.

➤ **Starter Workbooks**

These Tableau Packaged Workbook files are the starting point for each exercise. Most data connections are already set up in these workbooks so you can open to any chapter and start building.

- Tableau Training workbook – new
- Tableau Training workbook – dashboard

➤ **Completed Workbooks**

These Tableau Packaged Workbook files contain the solutions for each exercise. Compare your own workbook builds with these completed files to evaluate your work.

- Tableau Training workbook – completed
- Tableau Training workbook – completed dashboard

➤ **Data Sources**

These Excel files serve as the data sources for all of the exercises in the book. Some data manipulation exercises (i.e., table joining and data blending) will require you to connect directly to these files in order to create data connections.

- Tableau Training Practice Data
- Flu - test result details

You may decide to work through each chapter sequentially; however, the chapters are designed to stand alone should you elect to jump straight to a particular chart type or skill-building exercise. You will need Tableau Desktop version 8.2 or later to view the packaged workbook files.

The data provided to complete step-by-step instruction in the book ***Tableau for Healthcare*** is copyright protected by HealthDataViz, LLC and use of the data is limited to the training modules and exercises for which it was intended. You have agreed not to reproduce or distribute the data for any reason except as agreed to in writing by HealthDataViz, LLC.
